To Charge the Camera

Turn <u>off</u> the camera first (left as you look down at it with the camera facing forward). Plug the camera into your computer with the cable provided.

Photo Reviewer Software Instructions

1. To review the photos: Take the SD card out of the camera and plug it into the Micro SD USB stick. Then put the USB stick into your computer. It should appear as a device on your computer.
2. Double click on the Photo Reviewer software icon (PhotoReviewer.jar) – in the main directory of the SD card.

PhotoReviewer.jar

3. If you do not have Java 8 installed on your computer you will receive an error message. Please install the latest update from https://java.com/en/download/.
4. The application should launch and you will be presented with a button to load the photos.

Load Photos

5. Clicking the "Load Photos" button presents a directory selection dialogue. Navigate to the SD card on the camera and select the date which you wish to review and select "Open".

Cancel   Open

6. Complete the instructions on each screen clicking the "Next" button.
7. When you have completed all the tasks the final screen will be shown asking you to "Save"

Screen 8

Start ▭▭▭▭▭▭▭▭▭▭ End

These are the instructions to the user telling them how to send the photos and the files etc. We can tell them to take the folder saved on their desktop and email it to us.

Save

8. Select the same folder the photos came from (i.e. today's photos).
9. The software will save a results file in the directory you specified.

10. Please keep it on the SD card. You can also email the files to <researcher>
11. Once saved you can now close the Photo Reviewer software. Just click the close/cross button.
12. **Eject the SD card and put it back in the camera.**
13. Leave the camera charging overnight, and then unplug it and switch it back on in the morning. You should see the light flash for a few seconds after you switch the camera on.
